Tailored TDS
Modular Expandability
Cost Effective

WOW
WATER·ON·WATER™
REVERSE OSMOSIS

- Tailored TDS for all coffee or food service needs
- Modular expandability to meet your size requirements
- Compact size takes up less space than traditional air captive systems
- Hermetically sealed against ambient influences
- Easy to service, **sanitary rapid-change** filters
- Patented manifold design increases reliability
- Self-cleaning membrane to reduce maintenance cost
- Patented **water-on-water™** tank provides constant flow to the last drop

The Food Service RO Solution

With **Tailored TDS** and **Modular Expandability**

Tailored TDS
The system has been designed with the ability to adjust the TDS (total dissolved solids) to your desired level for that perfect brew

Modular Expandability
(patented parallel processing)

The WOW RO™ process has the ability to link WOW RO™ engines together for better sizing for each location. You can increase drawdown capacity by adding additional hermetically sealed tanks as your business needs grow

The Many Uses of WOW RO™

- Coffee & Tea
- Cooking
- Juices & Mixes

C IAPMO ®
